More details can be found in [here](#).

FEB. 2021-JULY 2021  
Research Assistant

**Oden Institute, UT Austin**

TOPIC: Representative subset selection for cold starting semi-supervised learning

ADVISOR: George Biros

*Proposed new method to select representative samples for classification.*

*Empirically showed that the new method outperforms than other methods sampling methods such as random, K-means, spectral clustering, coresets and MMD.*

AUG. 2019-AUG.  
2020  
Research Assistant

**Oden Institute, UT Austin**

TOPIC: Parallel algorithms for density-based clustering

ADVISOR: George Biros

*Proposed new algorithm to use directed  $k$ -nearest neighbor graph for density-based clustering.*

*Designed, implemented, and tested a hybrid MPI/OpenMP parallel algorithm.*

*Performed tests to assess the clustering quality and the scalability of the new scheme.*

FEB. 2019-AUG. 2019  
Research Assistant

**Oden Institute, UT Austin**

TOPIC: Fluid simulation in porous media with immersed faults

ADVISOR: George Biros

*Derived new PDEs as approximations and conducted convergence analysis.*

*Implemented the new formulations using Galerkin methods.*

*Tested preconditioned iterative Krylov solves of the new method.*
